

# Product Information Update

**Subject:** DCS Swirl Diffusers

**Date:** April 2007

**Applicability:** Leaflet 2/4.1/EN/4

**Ref:** PIU 1/1/539

PIU Issued: YES

NO

The DCS Swirl Diffuser is being re-engineered with the changes expected to take place during October 2007. The main changes will be:

1. The introduction of a circular face option DCS-P-R.
2. New sizes 593 and 618 for the square face option DCS-P-Q.
3. Central screw fixing with plenum box or top entry spigot with cross bar.
4. Pop rivet fixing between face plate and nozzle on types ...K and ...US.
5. Type DCS-N will be omitted from the range.
6. Type DCS-C will be replaced by DCS-LB with the perforated plate between nozzle and swirl element.
7. Universal plenum box design to be used.
8. Standard options M for volume control, MN for volume measurement and L for spigot lip seal become available.

Further details and prices/order codes will be circulated in due course.
