

Project Stakeholder: South Eastern Health & Social Care Trust

Architect: Avanti Architects

Main Contractor: Graham-BAM Healthcare Partnership

M&E Consultant: Cundall

Images: Rory Moore

The Project

The £85M, 30,000sqm, seven storey building will provide 12 inpatient wards comprising 288 ensuite bedrooms, a new day procedure unit including 4 state of the art operating theatres, and an endoscopy suite where patients will have the opportunity to have a broad range of procedures completed without having to stay in hospital overnight. The building will also provide a new cardiac cath lab and pharmacy departments.

Architects, Avanti, were recognized for the Ulster Hospital project with:

Building & Architect of the Year Awards 2017

Medical & Health – Shortlisted

European Healthcare Design Awards 2017

Our Solution

TROX UK supplied a range of products into the Ulster Hospital project including:
