

## Top Safety Accreditation for TROX UK Limited

TROX UK Limited has been awarded accreditation from Alcumus SafeContractor for achieving excellence in health and safety in the workplace.

Alcumus SafeContractor is a leading third party accreditation scheme which recognises extremely rigorous standards in health and safety management amongst contractors. It is used by thousands of organisations in the UK including SMEs and FTSE 100 companies.

The company's application for SafeContractor accreditation was driven by the need for a uniform standard across the business. SafeContractor accreditation will enhance the company's ability to win new contracts, and its commitment to safety will be viewed positively by its insurers when the company liability policy is up for renewal.

Gemma Archibald, Director of Alcumus SafeContractor said: "Major organisations simply cannot afford to run the risk of employing contractors who are not able to prove that they have sound health and safety policies in place. More companies need to understand the importance of adopting good risk management in the way that TROX UK has done. The firm's high standard has set an example which hopefully will be followed by other companies within the sector. SafeContractor plays a vital role in supporting our clients in meeting their compliance needs, whilst working with their contractors as they progress through the accreditation process."

"TROX UK are committed to ensuring the health and safety of not only our employees but of the colleagues we work with in the HVAC and construction industry" said Suzanne Archer, Finance Director at TROX UK. "It is every company's responsibility to ensure that we are keeping staff safe particularly

office is in Germany, generated in 2016 with a total of 3,770 employees around the globe revenues of nearly €500 million.

### ***Alcumus SafeContractor***

Alcumus SafeContractor is a third party accreditation scheme that assesses the health and safety arrangements, policies and qualifications of contractors. Many major clients recognise the scheme and accept the SafeContractor certificate as confirmation of competency in health and safety practice.

Under the SafeContractor scheme, businesses undergo a vetting process which examines health and safety procedures and their track record for safe practice. Those companies meeting the high standard are included on a database, which is accessible to registered users only via a website.

Client organisations who sign up to the scheme can access the database, enabling them to vet potential contractors before they even set foot on site. These clients agree that, as users of the scheme, they will engage only those who have received accreditation.

Over 300 major, nation-wide businesses, from several key sectors, have signed up to use the scheme when selecting contractors for services such as building, cleaning, maintenance, refurbishment or electrical and mechanical work.
