

M&E SERVICES INSTALLATION

WORKING EFFICIENTLY AND SAFELY

Whether it is heating, ventilation or air-conditioning you are an expert in M&E services installation and contribute considerably to the energy efficiency of your building and the well-being of its tenants. In this diverse area of activities, clever concepts that are easy and safe to install and operate are what count. TROX offers system solutions from a single source for new construction and refurbishment for every building type and every building size and our technical staff can provide guidance on product selection and optimisation for even the most complex applications.
