

UNDERGROUND CAR PARK

In underground car parks of hotels more than in other areas the ventilation must include a reliable fire protection and smoke extract system to provide maximum safety in case of a fire.

Type FKRS-EU fire dampers shut automatically to prevent the propagation of fire and smoke through ductwork to adjacent designated fire compartments. They are tested to EN 1366-2.

The purpose of \mathbf{smoke} extract $\mathbf{dampers}$ such as the $\mathbf{EK}\text{-}\mathbf{EU}$ is to remove smoke via smoke extract systems.

FIRE DAMPERS FKRS-EU

Ø 100 – 315 mm Classification: EI 90 (ve, ho i \hdots o) according to EN 13501-3 Fire resistance class: K90 according to DIN 4102-6

SMOKE CONTROL DAMPERS EK2-EU

B: 200 - 1.500 mm H: 200 - 800 mm Pressure level 3 (operating pressure from -1500 to +500 Pa)
