Ten steps to tackle energy consumption in laboratories

Reducing energy consumption in UK buildings has gained a new sense of urgency over the last year. With so much uncertainty regarding pricing of gas and electricity, building owners and occupiers are looking to estate management teams, and their HVAC technical specialists, to help them regain a degree of control over this aspect of operating cost.

Two requirements met with one solution: Clever volume flow rate measuring even with low airflow velocities

The requirement to save energy often leads to the installation of larger air handling units, which in turn results in lower airflow velocities. It is, therefore, necessary to change the measurement...
